July 17th, 1917

Graham Campbell, Esq.,
Superintendent of Grounds and Buildings,
University of Toronto.

Dear Mr. Campbell:

I am sending you letters from Professor Williams stating that he has in his possession part of a Cantridge galvanometer belonging to the University of Toronto which Professor Brodie sent to him before his death. Would it be too much trouble for you to have this returned to the University ?

Yours very sincerely,

President.

Campbell, Colin Graham (Superintendent of Buildings and Grounds)

July 1917, Jan 1918

REPLY TO BE ADDRESSED TO
SUPERINTENDENT

University of Toronto
TORONTO, CANADA

418

January 9th, 1918.

The President,

University of Toronto.

Dear Sir;-

Re Heating of Convocation Hall.

In reference to the coal required to heat Convocation Hall to a temperature of about 65 degrees F. and to keep it at that temperature, I would estimate the amount to be two tons per day. Allowing for the heating for Sundays only, the saving would be approximately ten tons per week.

The above information is based on an outside temperature of 16 degrees F.

This saving would of course, be dependent upon the variation of the outside temperature and the general weather conditions.

Yours faithfully,

W. H. Bennie

Assistant Superintendent.
